Agentic AI Commercialization — Executive GTM Summary

Commercializing Autonomous AI Systems

Agentic AI systems perceive, plan, act, and self-correct. They operate autonomously across workflows, machines, and environments.

Why It Matters

- Autonomous exception handling
- Multi-agent coordination
- Real-time decision cycles
- Continuous learning
- Operational resilience

GTM Strategy

1. **Define the Agent's Role**
2. **Build the Value Story**
3. **Align with OT/IT Architecture**
4. **Prove with Measurable ROI**
5. **Expand Across the Enterprise**

Illustrative Impact*

- 30–50% fewer manual interventions
- 25–40% throughput lift
- 20–35% cost reduction
- 99%+ decision accuracy
- 3–5× ACV expansion

**Illustrative ranges; not reported results.*
